

HSE Policy

The operations of Linjebygg shall not cause accidents, damages or losses. The HSE activities shall be highly prioritized to protect:

- Life and health of humans
- The environment
- Plant and production
- Knowledge and information

HSE is a work task to be executed through the line organisation from the CEO to all employees and is part of all managers' responsibility for results.

All employees are responsible for their own work and shall do what is necessary to prevent injuries to themselves or other personnel, pollution to the environment, or damage to equipment or materials.

In collaboration with employees shall the company systematically and continuously strive towards improving HSE, defining important HSE aspects, setting goals and implementing action plans.

Linjebygg shall always comply with applicable legal requirements of HSE. The company will implement measures to eliminate hazards and reduce risk to avoid health injury, personal injury or environmental pollution.
